ILLINOIS PAIN
INSTITUTE

Four-time recipient of Castle Connolly's Top Pain Doctor Award.

Improving lives through precise diagnosis, treatment, and compassionate care. The Illinois Pain Institute (IPI) is a four-time winner of Castle Connolly's Top Pain Doctor Award and Chicago's leading and longest established, multi-site interventional pain management practice, specializing in the precise diagnosis and treatment of spine, neck, back sciatica, headache, workers' compensation, and other painful conditions.

Whether you have had your pain for two weeks or, as for some, if previous diagnostic efforts have failed to explain the cause of the pain, IPI's expertise and our quality care may help.

Our mission is to provide a place of hope with precise diagnosis and treatment to fix the underlying cause of the pain and not mask the symptoms.

- All physicians are fellowship trained and specialize in Interventional Pain Medicine
- We focus 100 percent of our practice on diagnosis and treatment of painful conditions
- We are dedicated to reducing or eliminating drug use
- Outstanding back-to-work results
- Joint Commission on Accreditation of Healthcare Organizations (JCAHO) procedure facility on site

Our approach is tailored to fit individual needs with dignity and respect. IPI patients receive a highly

personalized treatment plan, keeping the patient well-informed and involved in care decisions.

The IPI physicians are: Terri Dallas-Prunskis, MD, John V. Prunskis, MD, FIPP, Andrew J. Yu, MD, Shingo M. Yano, MD, and associates.

To learn more about how our effective, compassionate care can solve your spine, neck, headache problems, workers' compensation, or other painful conditions, call 800-340-PAIN, or visit our Web site online at www.illinoispain.com.
